

The background of the top half of the page is a photograph of two men standing on a blue metal walkway in a large industrial factory. The man on the left is wearing a white button-down shirt and glasses, and is gesturing with his hands as if speaking. The man on the right is wearing a dark suit, a white shirt, and a striped tie, and is listening. The factory floor below them is filled with various pieces of industrial machinery and equipment, extending into the distance under bright overhead lights.

SIEMENS

Industry Services

Minimize cyber security risk by continuously protecting your production

Managed Security Service

- **Protect your people, assets, and intellectual property**
- **Leverage Siemens cyber expertise to focus on your core competencies**
- **Ensure compliance with current and emerging government regulations**
- **Safeguard your brand image and reputation**
- **Optimize your investments in cyber security by having predictable costs**

The risks of cyber attacks on production environments have increased exponentially. Whether the threats are from unintentional breaches, industrial espionage, or state-sponsored attacks, the damage to your business could be extreme

Successful attacks and infections, which include new rapidly evolving cyber threats from around the globe, often result in unscheduled downtime, interruptions in equipment availability, disruptions of continuous processes, and even the destruction of equipment. An effective defense of the production environment must continuously address these threats. Siemens Managed Security Service uses a “defense-in-depth” strategy focused on securing three levels of your operation: people, processes, and technology.

Answers for industry.

Siemens Cyber Defense Center delivers continuous cyber security protection

Our analysts proactively monitor vulnerability and cyber threat activity globally. When intelligence indicates an elevated risk, they define and deliver the appropriate defensive measures. If an incident is detected in your ICS, the Cyber Defense Center will coordinate a response consisting of investigation, forensic analysis, and remediation.

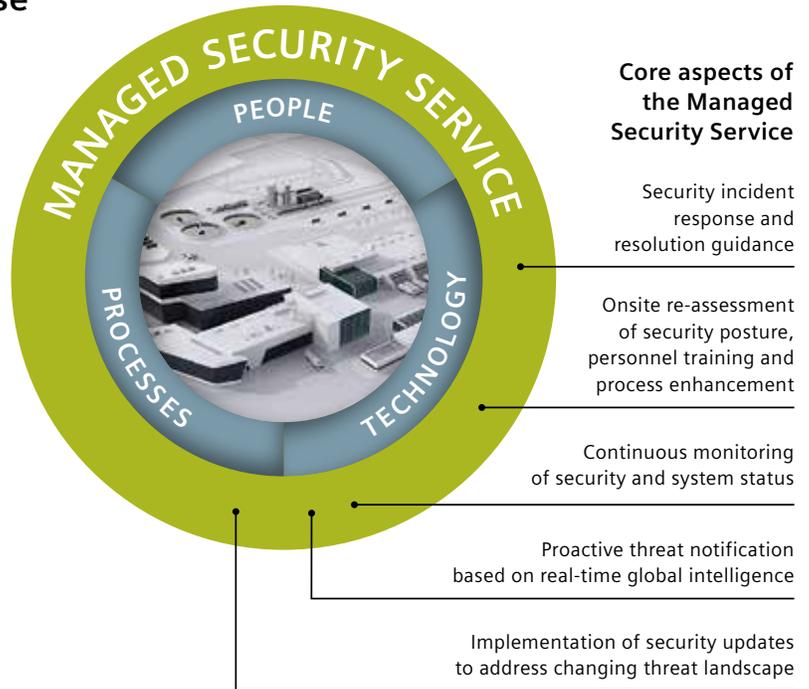

Managing your industrial cyber security risk requires world-leading automation expertise

As your industry partner, Siemens will assess, design, implement, and continuously monitor a cyber security solution tailored to fit your business – even if your equipment was not manufactured by Siemens

Using combinations of proven security measures to address specific industrial security areas and global intelligence gained through the Siemens Cyber Defense Center, we will provide the ongoing support needed to ensure the long-term protection of your assets and employees.

With Siemens Managed Security Services, you can ensure state-of-the-art security for your production while keeping costs transparent

You will gain the peace of mind that comes from working with a leader in automation technology and ICS, along with the confidence that all of your security needs will be reliably met through a single service provider – Siemens.

Security information

For the secure operation of Siemens products and solutions, it is necessary to take suitable preventive action (e.g., cell protection concept) and integrate each component into a holistic, state-of-the-art industrial security concept. Third-party products that may be in use should also be considered. For more information about industrial security, visit <http://www.siemens.com/industrialsecurity>.

This brochure contains only general descriptions or performance features, which do not always apply in the manner described in concrete application situations or may change as the products undergo further development. Performance features are valid only if they are formally agreed upon when the contract is closed.
